Letter of recommendation for Mr. Constantinos Frangeskou

It is my pleasure to write a recommendation letter for Mr. Constantinos Frangeskou. During his undergraduate studies Constantinos attended the core course “HY252 – Object Oriented Programming” that I taught in the Fall 2024-2025 semester, a very demanding course that includes 3 large sets of assignments, a large programming project (implementation of a computer game from scratch), a written midterm exam and a final exam. His final grade was 9/10 which is an excellent and rare feat. He has also submitted all the bonus exercises.

He also served as my teaching assistant for the course HY252 (fall 2025–2026), through the Teaching Assistantship for Undergraduate Students (DEPROFIT) programme, in which he demonstrated consistency, willingness, professionalism, and competence, and collaborated harmoniously with the rest of the team. I was completely satisfied.

In short, he is a very capable and highly promising young engineer and scientist, so I wholeheartedly support his application.
